Stunning Temper

Nonconformists with an abundance of vitality and wit will love "stunning temper". In this imaginative style, whimsy is given free rein. The cheerful colour palette includes reseda, mandarin, lime green, red and raspberry, teal, light grey and apricot. Powerful monochrome surfaces and surprising colour progressions cover furniture, objects and entire walls. Surfaces with effusive designs highlight the playful mix. The colours of photorealistic motifs are distilled, decorations arranged extravagantly; there's an almost surreal experimentation with materials and forms.

Subtle Spirit

Quietly and discreetly, "subtle spirit" gives rise to an exceptionally refined aesthetic. Harmony determines interior design - comfort, warmth and intimacy are important; materials and craftsmanship are of the highest standard. Jade, mauve and matt gold accentuate the delicate play of colours such as midnight blue, fir, and aubergine. Against the background of nuanced tones such as these, stylish exhibits and unique items of particular elegance are displayed to best advantage. Lights and accessories add a touch of Asian poetry; decorations have an enchanting, atmosphere-laden density.
