FACT SHEET: COUNTRY INFORMATION AT A GLANCE (Germany)

Strategic location on North European Plain and along the entrance to the Baltic Sea; most major rivers in Germany - the Rhine, Weser, Oder, Elbe - flow northward; the Danube, which originates in the Black Forest, flows eastward.

As Europe's largest economy and second most populous nation (after Russia), Germany is a key member of the continent's economic, political, and defence organizations. European power struggles immersed Germany in two devastating world wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key western economic and security organizations, the EC (now the EU) and NATO, while the communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German reunification in 1990. Since then, Germany has expended considerable funds to bring eastern productivity and wages up to western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro.

India-Germany Bilateral Economic & Commercial Relations

India was amongst the first countries to establish diplomatic ties with the Federal Republic of Germany after the Second World War. Today, Germany is amongst India's most important partners both bilaterally and in the global context. India and Germany have a 'Strategic Partnership' since 2001, which has been further strengthened with the Intergovernmental Consultations (IGC) at the level of Head of Governments which allows for a comprehensive review of cooperation and identification of fresh areas of engagement. India is amongst a select group of countries with which Germany has such a dialogue mechanism. The 4th IGC was held in Berlin on May 30, 2017, wherein 12 bilateral cooperation documents in various sectors were signed.

Economic & Commercial Relations: Germany is India's largest trading partner in Europe. India was ranked 26th in Germany's global trade during 2017. Germany is the 7th largest foreign direct investor in India since April 2000. Germany's total FDI in India from April 2000 until March 2018 amounted to US\$ 10.85 billion.

India has always seen Germany as the most attractive technology partner. A High Technology Partnership Group (HTPG) for identifying specific opportunities for high technology collaboration under the “Make in India” programme, in particular in areas of skill development, defence manufacturing, machine tools, maritime technology and the blue economy.

Possibilities of cooperation in the field of Industry 4.0, which covers automation and data exchange in manufacturing technologies, is being explored. Germany has great expertise in the area of Vocational Education and Training for which a joint working group exists. India’s railway modernisation and expansion plans offer considerable opportunities for the German rail industry. Renewable energies and sustainable urban development are other major areas of India-German cooperation.

Germany’s active consideration of an Indian proposal for a MoU on mutual recognition of qualifications will certainly enhance student exchanges. It is with a similar objective in mind that during Macron’s visit India and France agreed to give mutual recognition to academic degrees.

Facilitating Trade: A Fast-Track System for German companies has been set up in the Department of Industrial Policy and Promotion (DIPP). To facilitate the entry of German Mittelstand (Medium Sized Companies) in India, the Embassy of India, Berlin runs the Make in India Mittelstand (MIIM) Programme since September 2015. Currently, 117 German Mittelstand (MSMEs) companies are being facilitated through the MIIM Programme for market entry and investment in India.

Science & Technology: Indo-German Science & Technology cooperation started with the signing of the Intergovernmental S&T Cooperation Agreement in 1971 and 1974. There are more than 150 joint S&T research projects and 70 direct partnerships between Universities of both countries. India's scientific establishments have close partnerships with German R&D institutions, including the Max Planck Society, Fraunhofer Laboratories and the Alexander von Humboldt Foundation.

Investment: Indian investment in Germany has also increased in recent years. The IT sector continues to be the best represented in terms of foreign direct investment. According to fDi Markets, India has initiated 40 projects in Germany since 2003, 20 of which are in the software and IT sectors.

Indian companies either acquiring firms or starting their own subsidiaries in Germany include Ranbaxy, Samtel, NIIT, Wockhardt, Graphite India Limited, Megasoft, Torrent Pharmaceutical, Tata Auto Component Systems, Bharat Forge Limited, Hexaware Technologies, Hinduja Group, Tooltech Software, Ocimum Biosolutions, Bharat Fritz Werner Ltd (BFW), Biocon, Lupin, IFGL Refractories, Kirloskar Electronic Company (KEC), 7 Seas Technologies Ltd, MKU Group, Kalyani Group, Sakthi-Group, Sintex Industries, Techno Life style, Kiri Dyes & Chemicals Ltd etc.

As Germany has a large number of technically strong small and medium-sized companies, the potential for strategic acquisitions by Indian companies remains strong. A recent study of the Technical University of Hamburg-Harburg estimates the total volume of Indian investments in Germany at over USD 4 billion. Of this, roughly USD 2 billion was invested in 2008 (USD 825 million in 2007), which is incontrovertible proof that India is emerging as a major investor in foreign markets.

Culture: India and Germany have a long tradition of academic and cultural exchange. Max Mueller was the first scholar of Indo-European languages to translate and publish the Upanishads and the Rigveda. There has been growing interest in Germany in Indian dance, music and literature, as well as motion picture and TV industry, in particular, Bollywood. Indian films and artists regularly feature at the Berlin International Film Festival and at festivals across Germany. German interest in the Indian philosophy and languages resulted in the setting up of the first Chair of Indology at the University of Bonn in 1818. The Government of India has funded 31 short term rotating chairs of Indian studies in German Universities so far.

Executive Summary

The Report on “**Exploring Export Potential of Handicrafts to Germany**” describes one of the important markets in Germany. The report aims to study the structure of imports of German handicraft industry and presents a comparative country analysis of India and its major competitors in order to get the insight for carrying out the trade with Germany. This report is quantitative in nature; and based on it, it draws qualitative insights after the in-depth analysis of the 167 HS Codes of different Handicrafts product categories.

The different analytical ratios and other calculative parameters such as the Trade Indicators used in the study are: Trade Intensity Index (TII) of Germany & its importing international markets, Revealed Comparative Advantage (RCA) Index of 167 HS Codes, Trade Potential of India, Unit Value Analysis, Trade Complementarity Index and Tariffs analysis etc. to name a few among different other trade indicators. Upon the completion of different analysis on these 167 HS Codes, they are categorized as:

A: Products with High Export Potential to Germany

B: Other Recommended Products

Moving ahead with the report brings the import pattern of Germany for all these 167 Handicraft items from the world to understand the potential of the market so that the Indian exporters may trace the export strategy from India to Germany. The report also indicates the top supplying countries to Germany for these 167 Handicraft products comparing India’s performance and its rank. Comparative Unit Value Analysis was done on these 167 Handicraft Products, also comments on the pricing strategy that can be undertaken by the Indian exporters before fixing the price of these Handicraft items is included. This would certainly help the Indian Exporters to study and analyse Germany’s importing trends and competitiveness in detail.

It may also be noted that all data on 167 HS Codes has been collected from **ITC Trade Map** (Source: <https://www.trademap.org/Index.aspx>), **The Embassy of India Berlin, Germany** (Source: <https://indianembassyberlin.gov.in>) and various other sources. Utmost care has been taken to compile and present data.

Some **limitations** to the report are:

- The trade data for all 8 Digit HS codes was not available.
- For every Handicrafts HS code as per Indian classification where exact HS code at 8 digit parity do not exist, a corresponding/similar code used in Germany is considered.
- The photographs used in this report are only indicative in nature and are primarily sourced from online stores selling in Germany.

Analytical Ratios & other parameters used in the Study

1. Trade Intensity Index (TII)

The trade intensity index (T) is used to determine whether the value of trade between the two countries is greater or smaller than would be expected on the basis of their importance in world trade. It is defined as the share of one country's exports going to a partner divided by the share of world exports going to the partner. It is calculated as:

$$T_{ij} = (x_{ij}/X_{it})/(x_{wj}/X_{wt})$$

Where, x_{ij} and x_{wj} are the values of country i's exports and of world exports to country j and where X_{it} and X_{wt} are countries i's total exports and total world exports respectively. An index of more (less) than one indicates a bilateral trade flow that is larger (smaller) than expected, given the partner country's importance in world trade.

2. Revealed Comparative Advantage Index (RCA)

Measures of revealed comparative advantage (RCA) have been used to help assess a country's export potential. The RCA indicates whether a country is in the process of extending the products in which it has a trade potential, as opposed to situations in which the number of products that can be competitively exported is static. It can also provide useful information about potential trade prospects with new partners. Countries with similar RCA profiles are unlikely to have high bilateral trade intensities unless intra industry trade is involved. RCA measures, if estimated at high levels of product disaggregation, can focus attention on other non-traditional products that might be successfully exported. The RCA index of country I for product j is often measured by the product's share in the country's exports in relation to its share in world trade:

$$RCA_{ij} = (x_{ij}/X_{it}) / (x_{wj}/X_{wt})$$

Where, x_{ij} and x_{wj} are the values of country i's exports of product j and world exports of product j and where X_{it} and X_{wt} refer to the country's total exports and world total exports. A value of less than unity implies that the country has a revealed comparative disadvantage in the product. Similarly, if the index exceeds unity, the country is said to have a revealed comparative advantage in the product.

3. Trade Potential Calculation

Trade potential is defined as the lower value between the country's exports and the partner country's imports, minus the actual current trade between the two countries.

$$\text{Trade potential} = \min \{\text{country's exports; partner country's imports}\} - \text{actual bilateral trade}$$

4. Unit Value Analysis

Unit Value is calculated as the value of a particular product (in USD) imported by a country A from country B divided by the quantity of the same product (in KGs) imported by the country A from country B.

Its unit is **USD per kilograms**.

5. Trade Complementarity Index

The trade complementarity index indicates to what extent the export profile of the reporter matches, or complements, the import profile of the partner. A high index may indicate that two countries would stand to gain from increased trade, and may be particularly useful in evaluating prospective bilateral or regional trade agreements

Formula- $RCA_{Xik} = (X_{ik}/X_i)/(X_{wk}/X_w)$ $RCA_{Amjk} = (M_{jk}/M_j)/(X_{wk}/X_w)$

$C_{ijk} = RCA_{Xik} * RCA_{Amjk}$

Among it, X_{ik} and X_{wk} are the export value of product k in country i and the world; X_i and X_w are the total export value of country i and the world; M_{jk} is the import value of product k of country j; M_j is the total import value of country j. The greater the value of $RCA_{Xik} * (RCA_{Amjk})$, the larger dominant advantage of country i (j) in product k. When both are large, it means country i has a stronger comparative advantage in product k and country j has a greater comparative disadvantage in product k, so the two countries complement each other in product k; the greater the value of C_{ijk} , the stronger trade complementarity.

Therefore, after analyzing RCAs, Trade Complementary Index of India & Germany for respective HS Codes and calculation of India's Trade Potential, the products under Art metal wares can be classified into following two categories on the basis of their export potentials to Germany.

A. Products with high Export potential:

1. 73239420: UTENSILS
2. 73239490: OTHER HOUSEHOLD ARTICLES OF IRON N.E.S.
3. 74199920: UTENSILS ARICLES OF COPPER ALLOYS ELECTROPLATED WITH NICKLE
4. 74199930: ARTICLE OF BRASS
5. 74199940: COPPER WORKED ARTICLES
6. 74181021: UTENSILS OF BRASS
7. 74181022: COPPER UTENSILS
8. 96140000: SMOKING PIPES AND CIGAR OR CIGARETTE HOLDER AND PARTS THEREOF.

B. Other Recommended Products:

1. 83061000: BELLS GONGS AND THE LIKE

- **Codes with high Export potential:** **732394 & 961400 (India's 6 Digits)** have a high RCA and India's Trade potential has good value but it should be noted that UVA of India is **USD 5.82 & USD 6.5** which is facing stiff completion from China, Thailand & Italy. So to increase trade, India should review its pricing strategy.
- **Recommended Codes:** These codes are recommended as India has good RCA value. But it also be noted that Germany's global imports value is also high. So by aggressive push, India has a good chance to capture the market for these codes.
- **741999 (India's 6 Digits)** have good RCA and India's Trade potential good value. Tariff imposed on India is **3.5%** and the unit value of India is **USD 16**. Major competitor countries are Italy, China and France with aggressive price
- **741810 (India's 6 Digits)** have good RCA and India's Trade potential value is also highe. Tariff imposed on India is 3.3% and the unit value of India is **USD 43** and **USD 19**. Major competitor countries are Italy, China and France with aggressive price

***Note:**

- For Art metal ware, India's export to Germany data at 8 digits is available. However, for some codes, Germany's imports at 8 digits are not available. Therefore for every India's 8 Digit ITC HS Code, Germany's corresponding 8 digits ITC HS Code has been taken.

Therefore, after analyzing RCAs, Trade Complementary Index of India & Germany for respective HS Codes and calculation of India's Trade Potential, the products under Art metal wares can be classified into following two categories on the basis of their export potentials to Germany.

A. Products with high Export potential:

1. 94036000: OTHER WOODEN FURNITURE WITH OR WITHOUT EMBELLISHMENTS OF OTHER MATERIAL
2. 97019091: DOMESTIC ARTICLES OF WOOD HAND DECORATED
3. 97019099: OTHER HAND DECORATED MANUFACTURED ARTICLES

B. Other Recommended Products:

1. 44209090: OTHERS-WOOD MARQUETRY & INLAID WOOD; CASKETS & CASES FOR CULTRY & OTHR SIMILAR ARTICLES OF WOOD; STATUETTES AND OTHER ORNAMENTS, OF WOOD; WOODEN ARTICLES OF FURNITURE NOT FALLING IN CHAPTER 94
- **Codes with high Export potential:** **940330 & 970190 (India's 6 Digits)** have a high RCA and India's Trade potential has good value but it should be noted that UVA of India is **USD 3.05 & USD 12** respectively which is facing stiff completion from China (**USD 2.5**), Poland (**USD 1.7**) & Italy (**USD 2.48**). So to increase trade, India should review its pricing strategy. Tariffs levied on these codes are **0%**.
- **Recommended Codes:** These codes are recommended as India has good RCA value. But it also be noted that Germany's global imports value is high. So by aggressive push, India has a good chance to capture the market for these codes.

- **44209090 (India's 8 Digits)** have good RCA and India's Trade potential good value. Tariff imposed on India is **0%** whereas China duty levied is **2.3%**. The unit value of India is **USD 7.53**. Major competitor countries are Indonesia **USD 3.23**, China **USD 9.53**.
- In the case of Woodware, Germany itself is giving strong competition to Indian exports of woodware. For many HS codes, Germany has good RCA value, depicting their relevant advantage over Indian exports. So Indian exporters should be cautious while entering into the market.

***Note:**

- For Woodware, India's export to Germany data at 8 digits is available. However, for some codes, Germany's imports at 8 digits are not available. Therefore for every India's 8 Digit ITC HS Code, Germany's corresponding 8 digits ITC HS Code has been taken.

- **Codes with high Export potential:** **640610 & 940490 (India's 6 Digits)** have good RCA and India's Trade potential has a high value but it should be noted that UVA of India is **USD 63** & **USD 4.74** respectively which is facing stiff completion from Bosnia (**USD 43**), Brazil (**USD 48**) & Croatia (**USD 56**). So to increase trade, India should review its pricing strategy. Tariffs levied on these codes are **0%**.
- **Recommended Codes:** These codes are recommended as India has less RCA value. But it should also be noted that Germany's global imports value is high. - **Codes with high Export potential:** **560500 (India's 6 Digits)** has a high RCA, TCI value is also good and India's Trade potential has good value but it should be noted that UVA of India is **USD 16** which is facing competition from China (**USD 14**) & Germany (**USD 9.18**). So to increase trade, India should review its pricing strategy. Tariffs levied on these codes are **4%** whereas **0%** duty is being levied on China and Germany.
- **Recommended Codes:** These codes are recommended as India has good RCA value. Trade Complementary Index between India & Germany is good. But it also be noted that Germany's global imports value is high. So by aggressive push and product innovation, India has a reasonable chance to capture the market for these codes.

Therefore, after analyzing RCAs, Trade Complementary Index of India & Germany for respective HS Codes and calculation of India's Trade Potential, the products under Art metal wares can be classified into following two categories on the basis of their export potentials to Germany.

A. Products with high Export potential:

1. 92060000: PERCUSSION MUSICAL INSTRUMENTS (E.G. DRUMS, XYLOPHONES, CYMBOLS, CASTENETS, MARACAS)

B. Other Recommended Products:

Nil

- **Codes with high Export potential:** **920600 (India's 6 Digits)** has a high RCA, TCI value is also good and India's Trade potential has good value but it should be noted that UVA of India is **USD 29** which is facing competition from Netherlands (**USD 29**) & China (**USD 9.14**). So to increase trade, India should review its pricing strategy and lower down trade barriers. Tariffs levied on these codes are **0%**.

***Note:**

- For Misc. Handicrafts-Musical Instruments, India's export to Germany data at 8 digits is available. However, for some codes, Germany's imports at 8 digits are not available. Therefore for every India's 8 Digit ITC HS Code, Germany's corresponding 8 digits ITC HS Code has been taken.

- **Codes with high Export potential:** **340600 & 950510 (India's 6 Digits)** have good RCA and India's Trade potential has good value but it should be noted that UVA of India is **USD 2.73** & **USD 11** respectively, which is facing stiff completion from China, Thailand & Italy. So to increase trade, India should review its pricing strategy.

- **Recommended Codes:** These codes are recommended as India has good RCA value. But it also be noted that Germany's global imports value is also high. So by aggressive push, India has a good chance to capture the market for these codes.
- **482390 (India's 6 Digits) 48239018 (India's 8 Digits)** has a high RCA and India's Trade potential value is also high. Tariff imposed on India is **0%** and the unit value of India is **USD 3.52**. Major competitor countries are China (**USD 6.6**), France (**USD 1.19**) & Netherlands (**USD 1.62**).
- **960200 (India's 6 Digits) 96020090 (India's 8 Digits)** have a high RCA and India's Trade potential value is also high. Tariff imposed on India is **0%** and the unit value of India is **USD 25**. Major competitor countries are Belgium (**USD 29**) and France (**USD 51**).

***Note:**

- For Other Handicrafts, India's export to Germany data at 8 digits is available. However, for some codes, Germany's imports at 8 digits are not available. Therefore for every India's 8 Digit ITC HS Code, Germany's corresponding 8 digits ITC HS Code has been taken.
